

# EXTINGUISHING

We must FULLY extinguish our campfires before leaving the area or going to sleep. Remember if it's smoking, it is not out!

This can be done by:  
Pouring water on the fire.

\*be cautious as this can splash up hot embers onto you or nearby flammable substances.

Pouring dirt or sand on it.

\*be aware as this method can still leave some burning embers below that can't be seen.

Stomping on it.

\*best done after water, dirt and sand have been poured on the campfire already to be safe and put out any remaining embers.
