

NAVIGATING: COMPASS

Using a compass can take a minute to learn and understand.

A good compass will have a rotating bezel to help you stay on track. There is a single triangle on one side, and the opposite side has two triangles. To use a compass, hold it flat in your hand like a pancake. The red needle always points to the north, like a little explorer guiding you. Turn your body until the 'N' on the compass matches where the red needle points. Now, you know which way is north!
